MUSA (MUMBAI UNIVERSITY STUDENTS ASSOCIATION)

QUESTION BANK OF SOFTWARE TESTING & QUALITY ASSURANCE

B.E SEM-VII **SCHEME: R-19 C SCHEME** **FOR WINTER SESSION 2026**

BRANCH: IT **BATCH: REGULAR & KT**

Q.1) Explain Agile testing and its life cycle along with the challenges in Agile Testing.

Q.2) Discuss Automation Testing tool selection and cost criteria and explain the need.

Q.3) Explain McCall's quality factors and criteria.

Q.4) Explain Regression testing and its types in detail.

Q.5) Explain any two automation tools in detail.

Q.6) Explain Alpha and Beta Testing in detail. What is the entry exit criteria for Alpha testing?

Q.7) Explain Mutation testing in detail.

Q.8) Explain Verification in high level and low level design.

Q.9) Explain in detail Test Point Analysis (TPA) also describe the procedure for TPA.

Q.10) What are the key elements of Test management? Explain in detail the structure of Testing Group.

Q.11) Define Software Metrics. What is need of Software Metrics. List and explain different types of Software Metrics.

Q.12) Explain with an example Incremental Integrating testing with its types.

Q.13) What are graphs metrics? Explain with an example how to calculate cyclomatic complexity using graph metrics.

Q.14) Explain different components of Test plan. Illustrate test plan hierarchy with a neat diagram.

Q.15) Explain black box and white box testing in detail. ***(May ask in differentiate between form also)***

Q.16) Explain in detail Software Quality Management along with its need.

Q.17) Classify different types of bugs based on the software development lifecycle (SDLC) with an example.

Q.18) Why is automation important in testing? What are the guidelines for selecting testing tools?

Q.19) Explain the process of test suite prioritization with its type in detail with example

Q.20) Explain software testing lifecycle. Explain software testing model with a neat diagram.

Q.21) Explain the goal of software testing. Explain the verification of requirements and objectives in Software testing.

Q.22) Explain different Quality aspects the needs to be consider while testing web based system.

Q.23) How do unit testing and Integrating testing differ from each other?

MUSA. All rights reserved. This material is the exclusive property of MUSA. Unauthorized reproduction, distribution, or is strictly prohibited.

Q.23) Differentiate between the following:

i) Effective software testing vs Exhaustive software testing
ii) Traditional software testing and Web based software testing

Q.23) Differentiate between the following:

i) Effective software testing vs Exhaustive software testing
ii) Traditional software testing and Web based software testing
iii) Primary and Secondary mutants
iv) Static and Dynamic Testing
v) Verification and Validation

Q.24) Write a short note on:

i) Six Sigma and How is six sigma applied in software development?
ii) ISO 9000:2000
iii) Efficient test suite management and benefits of Test suite minimization
iv) Explain the need of automation in testing
v) JIRA automation testing tool and Bugzilla Testing tools with its features and use.

TOP 15 QUESTION BANK OF SOFTWARE TESTING & QUALITY ASSURANCE

B.E SEM-VII **SCHEME: R-19 C SCHEME** **FOR WINTER SESSION 2026**

BRANCH: IT **BATCH: REGULAR & KT**

Note: ***Refer our complete question bank for better marks and passing***

Q.1) Explain Agile testing and its life cycle along with the challenges in Agile Testing.

Q.2) Explain McCall's quality factors and criteria.

Q.3) Explain Regression testing and its types in detail.

Q.4) Explain Alpha and Beta Testing in detail. What is the entry exit criteria for Alpha testing?

Q.5) Discuss Automation Testing tool selection and cost criteria and explain the need.

Q.6) Explain in detail Test Point Analysis (TPA) also describe the procedure for TPA.

Q.7) Explain any two automation tools in detail.

Q.8) Define Software Metrics. What is need of Software Metrics. List and explain different types of Software Metrics.

Q.9) Explain Verification in high level and low level design.

Q.10) What are graphs metrics? Explain with an example how to calculate cyclomatic complexity using graph metrics.

Q.11) Explain different components of Test plan. Illustrate test plan hierarchy with a neat diagram.

Q.12) Explain software testing lifecycle. Explain software testing model with a neat diagram.

Q.13) Explain the goal of software testing. Explain the verification of requirements and objectives in Software testing.
